Total points in 9 areas			
Overall Rating		NAN	

4. Analysis Results

1. Over all Achievement = NAN out of 5.00 =

Training Feedback Analysis

5. Areas of Improvements:

SL	Areas	Rating
----	-------	--------

Although they are very satisfactory as numeric analysis, but we can work for them for further improvements.

6. Comments from Participants:

a) Everything was so good. Thanks a lot to Motaleb sir and whole GSCS group for organizing this amazing and important training in free of cost. I think sir should carry on this course also internationally and give opportunity to all to learn from him with his excellent presentation with specific story in every point. It will be better for everyone if you take this course on "Communication strategies for a virtual age" who want to present or train people online. It is free now with certification in coursera. i hope everyone will do this course. i found it so good. here is the link: <https://www.coursera.org/learn/communication-strategies-virtual-age>.
